

IN THE CLAIMS

Claim 1. (Cancelled)

Claim 2. (Currently Amended) A high pressure, forceful 55% ~~VOC~~ volatile organic compound (VOC) hair styling spray composition ~~according to claim 1~~ including ~~consisting essentially of~~, by wt., a concentrate of about 4% of said copolymer an isobutylene/ethylmaleimide/hydroxyethylmaleimide copolymer as film-former, about 6-12% water, and about 45% ethanol, and a propellant consisting essentially of about 31% of (a), a hydrofluorocarbon (HFC), and about 6% of (b), in a mixture of propane/isobutene as a 50/50 wt./wt., mixture of propane/isobutane, providing a spray pressure of about 70 psi when used in combination with a Summit SV-9297 valve and a V-94, 0.025" MB actuator thereby delivering a mean spray particle size of about 60  $\mu$ m to the root of the hair, allowing for a dispersed, relatively dry spray pattern enabling root lifting and apparent volume on the hair with low tack on wet or dry hair.

Claim 3. (Currently Amended) The composition of claim 4 ~~2~~ wherein (a) said hydrofluorocarbon is 1,1-difluoroethane.

Claim 4. (Currently Amended) The composition of claim 4 ~~2~~ further comprising including one or more of a cationic polymer or a cationic surfactant, a corrosion inhibitor, or a silicone selected from phenyl trimethicone and cyclopentasiloxane.

Claim 5. (Cancelled)

Claim 6. (Cancelled)
